

Fostering cultural appreciation today for better understanding tomorrow.

THE PROBLEM

U.S. grade schools continue to **miss the opportunity** to provide an enriched cultural education experience to young children.

Common core standards place emphasis on mathematics and English literacy, with **no guidelines on incorporating cultural education** or culturally-relevant material.

OUR SOLUTION

We aim to provide accessibility to a wholesome cultural educational experience to include **facts about countries and their history**, and specifics such as **lifestyle, regional languages, foods, traditions, festivals and customs**.

Through an immersive education for children ages 5-10, or grades K-5, our goal is to work towards **fostering cultural compassion**, understanding and empathy as a child moves towards adolescence and into adulthood.

OUR AUDIENCE

By collaborating with schools, K-5th grade students, children's organizations, after school programs, summer school programs, summer camps, homeschooling curriculums, and libraries, CICAU will help create **greater cross-cultural understanding** for the next generation of children.
